AUTUMN 2 2024

ECO CHALLENGE

The Eco-Committee would like to invite you all to take part in their first Eco Challenge of the year.

We have joined the SchoolCycled scheme which involves us collecting plastic bottle lids which will then be recycled and made into items for the school. This includes chairs, tables and planters! The items will be 100% recycled!

Please send any plastic bottle lids into school and your child can put them into one of our recycling boxes.

We are keen to expand this into the local community to support the environment as much as possible - if you would like to collect plastic bottle lids at your workplace or know of a local business who would like to take part and support the school, please spread the word! We have posters available to display - please pop into the school office if you would like one.
